Statement on Archival Language:

The David Allan Hubbard Library aims to describe archival materials in a way that is respectful to all communities who use, create, and are represented in our collections. However, the nature of historical materials is such that some material may represent positions, language, values, and

stereotypes that are not consistent with the current values and practices at Fuller Theological Seminary.

Within our finding aids, it is possible users may encounter language that is offensive or harmful. While some language included in finding aids was written by staff, other language originates from the people and organizations that created the material. For example, folder titles are often preserved from the creators. It is standard practice not to change them and, in some cases, it provides important context about the materials. When we find problematic language created by archivists and staff we strive to update it. When we find problematic language from the original creator we will transcribe as is to preserve the context of its creation.
