1	82	81 files and 1 phone book	Meeting briefings, notes, trip summaries	According to binder these are Trips (files on meetings not based in DC area)	Labeled box 2, Contains a notebook labeled as a phone message book; label on box says contains files 500-73019 (April 1992) to 509-73359 (October 1994)	In the binder it says that there were 4 different shipments of documents and artifacts. Boxes 500-627 were processed in 1998 and boxes 628-667 were processed in 2000. The binder only compiles information on those 2 shipments and has a note saying that 3 would arrive in 2001. There is also a note saying that eventually all four shipments would be merged. As of 02/13/2023 it is unclear if shipments 3 ever arrived or was processed. The first two shipments also remain in their original processing order lending me to believe that the collections were never merged and reordered.
2	55	55 files	Trip notes (college visits, NASA visits, other professional and government organization visits)	According to binder these are Trips (files on meetings not based in DC area)	Labeled box 3, Contains files 510-73361 (November 1994) to 519-73454 (December 1995)	For potential Series, I struggle a bit because I would've divided them into NASA documents (or government), personal documents, professional documents (but not spec. NASA i.e. honorary degrees and awards received for work at NASA but not affiliated with NASA). However, the previous processors were much more thorough creating separate series for meetings that took place in DC vs ones that did not. It could potentially be categorized into like a NASA series using the previous processing series as sub-series. I'm not sure though. The collection could also be processed by subject rather than topic, like papers, photos, cassettes/tapes, scrapbooks, artifacts?
