KEYT News video archive (FMST Mss 6)
Videotape Logs 1986-1992

This PDF contains information transcribed from story logs, which were contained in cases from some of the items in **Series 1: Santa Barbara Daily news footage, Subseries: Local (L) archive tapes (1985-1994)**. These logs contained information about the original item, including the tape ID assigned by the station, the broadcast date and time, runtime, and story title (or “Slug”) which is a brief 1-3-word description of the content of the story.

This information was transcribed from handwritten notes which have been lightly corrected for spelling and grammatical errors. In addition, there is no key provided for common broadcasting acronyms or internal abbreviations (e.g., “WX” for weather or “FOLO” for a follow-up story).
