Descriptive Summary

Title:

Archives Reference Collection, 1939-2025

Collection Number:

AFS1070.8A

Creator:

Ames Research Center

Dates:

Inclusive: 1939-2025

Extent:

Volume: Approximately 60 cubic feet.

The bulk of the collection is in analog form, with portions digitized or born digital.

Repository:

NASA Ames Research Center Archives
Moffett Field, California 94035

Abstract:

This collection of subject reference files provides a general overview of Ames Research Center from its origins in December 1939 as the Ames Aeronautical Laboratory through the present. Also represented are materials about the National Advisory Committee for Aeronautics, the National Aeronautics and Space Administration, and Moffett Federal Airfield.

Administrative Information

Access: Restricted Partly; This collection contains information that has Controlled Unclassified Information (CUI) and Export Control restrictions.

Distribution Limits: Partly Public; NASA employees contact archivist regarding restricted materials.

Publication Rights: This collection may contain copyrighted material. The researcher assumes full responsibility for conforming with the laws of copyright. Securing permission to publish or use materials is the sole responsibility of the researcher.

Languages and Scripts:

All records are in English.

Acquisition Information:

Transferred by the Ames Research Center Main Library in 2003.

Accruals:

Multiple accruals are added to the collection annually.

Custodial History

This collection originated in the Ames Research Center's (ARC) Main Library, which accumulated historical materials from Ames employees and retirees. It was temporarily transferred into the custody of ARC contract historian Glenn Bugos in 1998 who processed it and used it to support his

research for the center's third history book "Atmosphere of Freedom: Sixty Years at the NASA Ames Research Center." Circa 2000, after completion of the book, the collection was returned to the Main Library. In 2003, the collection was transferred to the newly-established ARC History Office and Archives. In 2006, the collection was overhauled by the ARC Archives and reformed as the Archives Reference Collection.

Scope and Content

This collection of reference files provides a general overview of Ames Research Center, from its origins in December 1939 to the present, spanning the center's affiliation with both the National Advisory Committee for Aeronautics (NACA) and the National Aeronautics and Space Administration (NASA). The collection contains information about the center's multidisciplinary research activities and associated facilities, as well as the center's management, programs, projects, culture, activities, achievements, and personnel. Also included is overview information about Moffett Field and its transfer from the US Navy to NASA. The collection does not provide a comprehensive representation of the center's history. The depth of documentation varies across subject areas, with some well represented and others lightly covered. Further, there is little correspondence in this collection. Formats vary across subjects and include textual materials of many types, photographs, moving image footage, audio recordings, ephemera, and memorabilia.

System of Arrangement

This is an artificial collection, which is arranged by subject and not provenance. The subject files are organized into four series:

- I. National Advisory Committee for Aeronautics (NACA), 1939-1958
- II. National Aeronautics and Space Administration (NASA)
- III. Ames Research Center, 1958-2025
- IV. Moffett Federal Airfield

Existence and Location of Originals

Prints and digital scans of Ames Research Center photographs comprise the bulk of the photographic materials in the collection. In large part, the originals (negatives and born digital images) are held by the National Archives and Records Administration and the Ames Research Center Photograph Library.

Existence and Location of Copies

Digital copies of portions of this collection are available.

Series Descriptions

Series I: National Advisory Committee for Aeronautics (NACA), 1939-1958.

This series provides overview information about Ames when it was the Ames Aeronautical Laboratory under the NACA. In addition, these files provide insight into the NACA research activities and people, mainly in the form of biennial and triennial inspection and annual reunion documentation.

Series II: National Aeronautics and Space Administration (NASA).

This series contains a sampling of overview reference documentation about agency-level programs, plans, personnel, facilities, and anniversaries. Included are strategic plans, facility summaries, program summaries, and telephone directories.

Series III: Ames Research Center, 1958-2025.

This series comprises the bulk of the collection and documents a range of center capabilities as well as information about research and facilities, programs, projects, personnel, center management, and center culture. Included are Ames center and facility overviews, research summaries, annual reports, speeches, newsletters, biographical files, telephone directories, anniversary files, awards files, scrapbooks and albums, bound volumes, audio and moving image recordings, ephemera and memorabilia.

Series IV: Moffett Federal Airfield.

This series contains a small collection of reference files related to Moffett Federal Airfield. This federal facility adjacent to the Ames campus came under the management of Ames following closure of the Naval air station. The files in this series include information about the establishment of Moffett Field and the base closure in 1994, anniversaries, Hangars 1, 2, and 3, some early newsletters, and photographs.
