

Hayden White Papers

Series 7 File Directory

This searchable document lists the digital files in the Hayden White Papers: Series 7: Digital Files.

General note

This file directory includes date last modified, size, and file name for each file, with file type listed afterwards if available. Folders are expressed as file paths.

Access information

Open for research. Digital files are available in the UCSC Special Collections and Archives reading room. Some files may require reformatting before they can be accessed. Technical limitations may hinder the Library's ability to provide access to some digital files. Access to digital files on original carriers is prohibited; users must request to view access copies. Contact Special Collections and Archives in advance to request access to digital files.

Processing information

The digital materials in this collection were processed by Patrick King, Kate Dundon, and Alix Norton in 2019. Digital files were transferred from carrier disks and hard drives in 2019. Some files were not able to be transferred from the carrier disks due to technical constraints. Duplicate files, personnel records, and other out-of-scope files were not retained. Files were not reformatted, and file names are original to the creator. Original disks were retained and are included in the collection.

Organization and Arrangement

The born digital files comprise one series of the collection of Hayden White Papers. The series is physically arranged into three components according to original physical format:

Disks (files from portable disks)

MacBook Pro (files from White's personal laptop computer)

Humanities (files from White's Humanities desktop computer)

The original order of the digital material, including file names and folder arrangement, has been retained without intervention by archives staff.

See the [Collection Guide to the Hayden White Papers](#) for more information.
